PROJECT OVERVIEW

OBJECTIVE

Our main objective is to save time for the user which will be spent on finding a solution for his printer problem.

Other objective that, Our expert system will contain a solution for the most common problems that face the user in his printer sorted by printer type and function

PROBLEM

Printers are very complex machines to every normal user since it was released. It's maintenance and fixing takes time and money from user.

SUMMARY

Our Desktop application program is an Expert System to help the user deal with his printer easily without returning to many persons or many unknown and unreliable sources that may cause time wasting . This system could solve most of printers common problems.
